PORTFOLIO

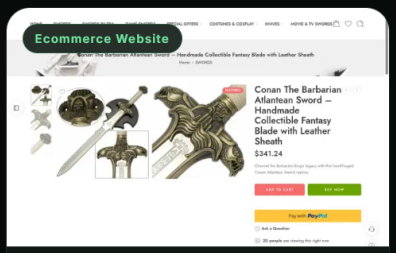

Ideas Shaped Into Digital Work

A look at focused digital work Revealer Labs can shape—from useful web platforms to automated workflows, interactive concepts and visual showcases.

Each entry is labelled by its real status—live website, concept demo, visual showcase, concept campaign or functional prototype.

All | Web Development | Mobile Apps | AI & Automation | Game Development | Brand & Motion

1 Insight

Web Development

Ash Blades

A live ecommerce storefront for swords, knives and cosplay collectibles, bringing category browsing, product imagery and detailed listings together in one shopping experience.

Ecommerce | Product Catalog | Responsive Web

Read live website case study

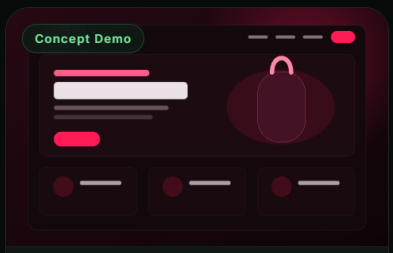

Mobile Apps

Grow Counter

A native Android counter that turns repeated actions into tree growth and a personal garden.

Java | Android Views | Offline-first

Read product case study

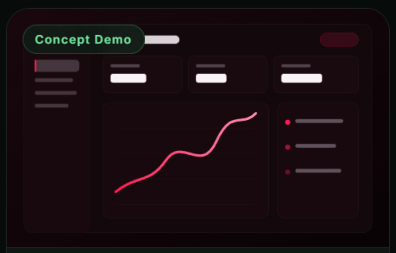

Web Development

Meridian Commerce

A focused storefront concept built to make product discovery feel calm and immediate.

Next.js | TypeScript | Commerce API

1 Insight

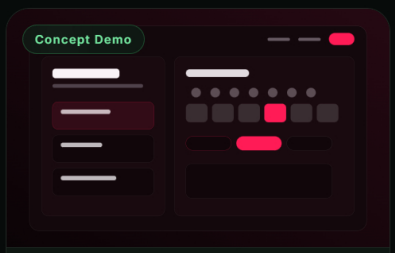

Web Development

Atlas Operations

A practical operations dashboard concept for seeing priorities without the noise.

React | Data Visualization | REST API

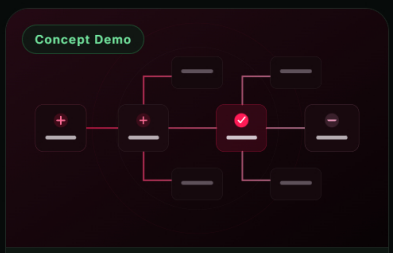

Web Development

Beacon Booking

A service-booking concept that turns availability into a simple, reassuring flow.

Next.js | Calendar API | PostgreSQL

AI & Automation

Flowline Ops

A workflow concept that moves incoming requests from review to the right next action.

AI Workflows | Webhooks | Node.js

CAPABILITY SHOWCASES

Different problems. The right digital shape.

CLARITY THAT CONVERTS

Business Websites

Purpose-built web experiences that explain the offer, guide the right next step and stay easy to manage as the business grows.

- Responsive product and service pages
- Conversion-focused user journeys
- Content and system integrations

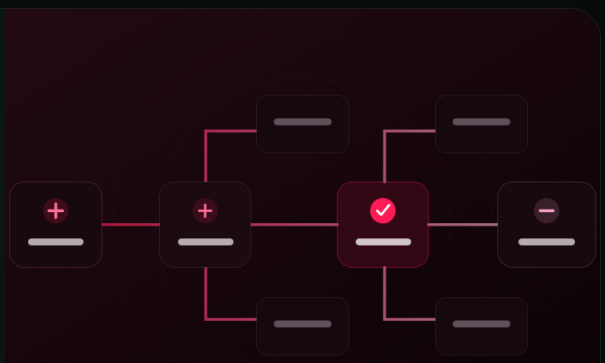

1 Insight

LESS REPETITION, MORE CONTROL

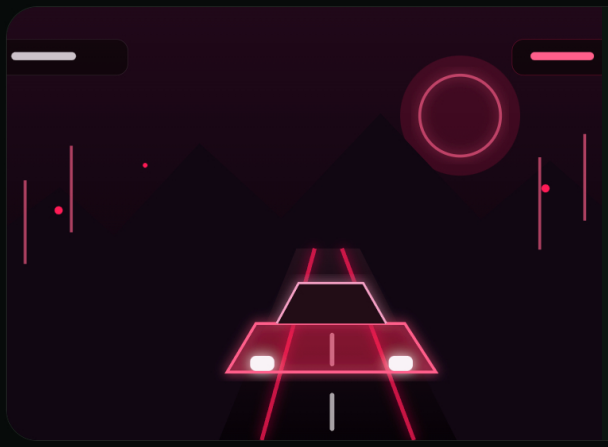

Workflow Automation

Connected workflows that handle routine movement of information while preserving clear review points, ownership and exceptions.

- Intake and routing workflows
- AI-assisted classification
- Human approvals and audit trails

1 Insight

SYSTEMS PEOPLE CAN FEEL

Interactive Experiences

Playable prototypes and real-time experiences shaped around a strong interaction loop, readable feedback and a distinct visual identity.

- Unity gameplay prototypes
- Interactive product experiences
- Reusable real-time systems

ABOUT

Code with context.

Revealer Labs is a digital studio focused on coding and practical problem-solving. We turn unclear, manual or technically demanding challenges into useful digital products and dependable systems.

The work is shaped around the need—not a template—so the result stays focused, understandable and ready to evolve.

HOW WE THINK

- Understand the real constraint
- Build the right-sized solution
- Make it clear and maintainable
